

ICAT's core messages for COP29

Transparency can help to bring the Paris Agreement on track.

- An evidence-based NDC update lays the foundation for building ambition that is supported by a realistic assessment. Use the BTRs submitted in 2024 for the NDC update in 2025.
- A credible just transition, i.e. one supported by a valid monitoring framework, is critical to enable transformational change.
- Transparency is central to climate finance planning and management, and key to mobilizing resources.
- Transparency presents multiple benefits, domestically and globally.
- Transparency is essential for engaging in Article 6 cooperative approaches.
- ICAT empowers countries to plan for and respond to climate change through sound data and analysis.
